

# POKER CHEAT SHEET

Poker follows the same basic order of cards as most other card games. The highest card is an Ace, followed by King, Queen and Jack. From there it goes down in numbers from 10 until 2. This means that a pair of Aces is higher than a pair of Kings and a three of a kind of Jacks will beat a three of a kind of 7s

## ROYAL FLUSH

Royal flush is the highest ranking standard poker hand. It is both a straight (5 sequentially ranked cards) and a flush (5 cards of the same suit), and plays ace high.

## STRAIGHT FLUSH

The second highest ranking standard poker hand. It is both a straight (5 sequentially ranked cards) and a flush (5 cards of the same suit), but unlike the royal flush, aces are only played low.

## FOUR OF A KIND

The third highest ranking standard poker hand. The rank of the quad will defeat lower ranking quads, regardless of the rank of the unmatched card.

## FULL HOUSE

The fourth highest ranking standard poker hand. The rank of the trio will defeat lower ranking trios, regardless of the rank of the pair.

## FLUSH

The fifth highest ranking standard poker hand. The highest ranking card, or next highest ranking card where high ranked cards match in each hand, will defeat the highest ranking card in another hand.

## STRAIGHT

The sixth highest ranking standard poker hand. The highest ranking card in one hand will defeat the highest ranking card in another.

## THREE OF A KIND

The seventh highest ranking standard poker hand. The rank of the trio will defeat lower ranking trios, regardless of the rank of the 2 unmatched cards.

## TWO PAIR

The eighth highest ranking standard poker hand. The higher ranking pair will defeat lower ranking pairs, regardless of the rank of the unmatched card, unless the ranks of both pairs are the same in each hand.

## ONE PAIR

The ninth highest ranking standard poker hand. The rank of the pair will defeat lower ranking pairs, regardless of the rank of the unmatched cards, unless the rank of the pair is the same in each hand.

## HIGH CARD

The tenth highest, and last, ranking standard poker hand. The highest ranking card in a mismatched hand, or next highest ranking card where high ranked cards match in each hand, will defeat the highest ranking card in another hand.
